

How do I start a **charging session** in the app that is **paid ad hoc**?

1. Download the Mobiflow app from the Apple Store or Google Play Store.

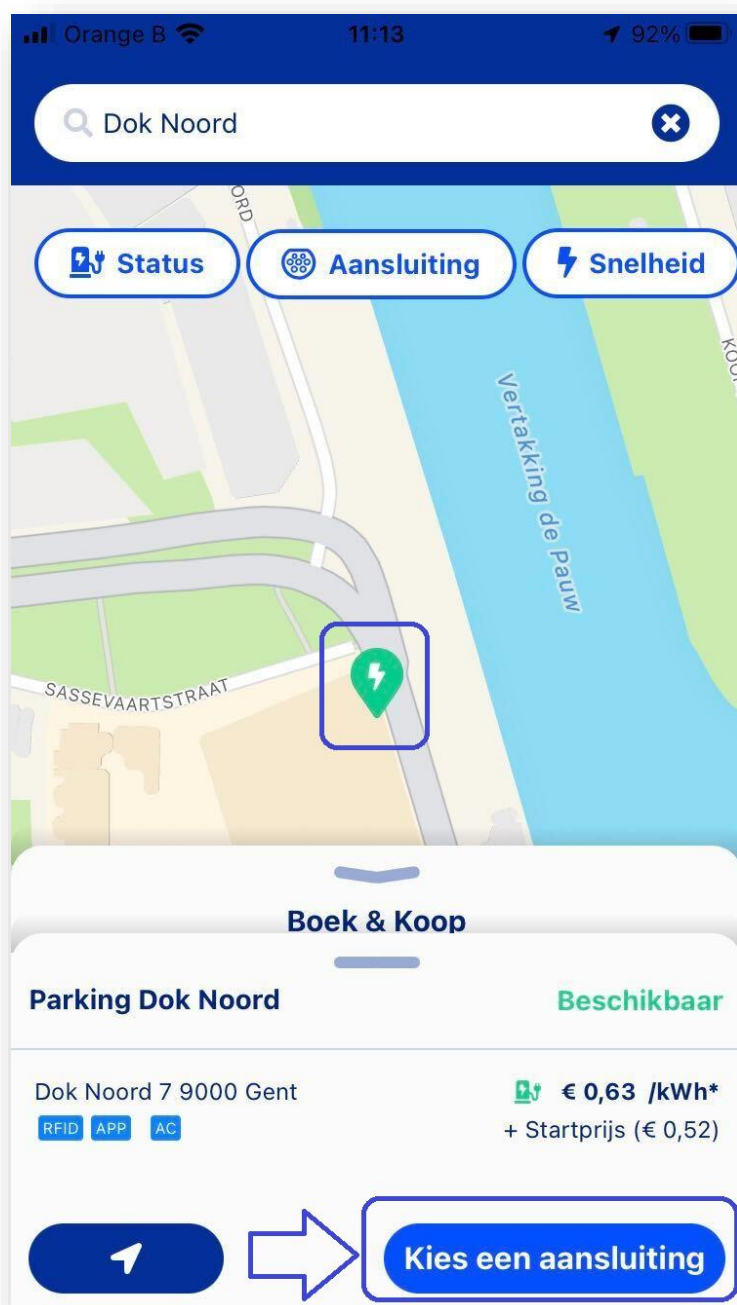

2. Click '**Skip for now**' to proceed with an ad hoc payment.

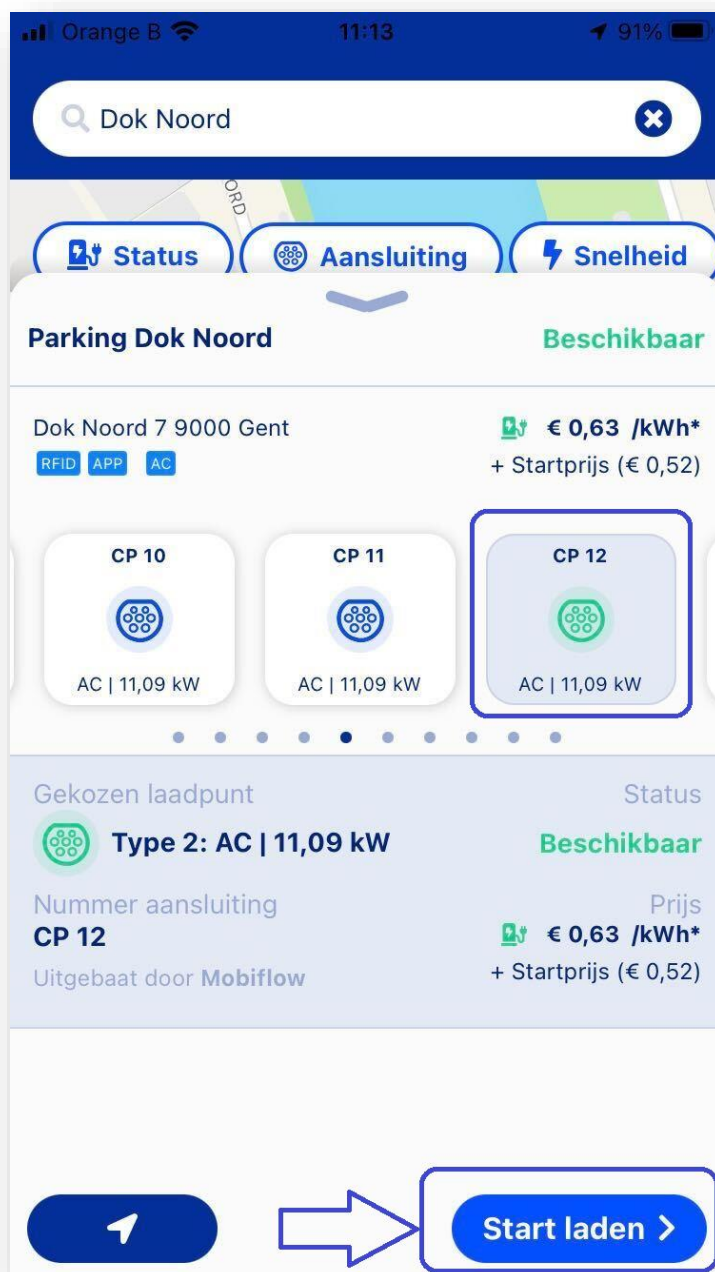

3. Click the **'Charging'** button and enter your location in the search field.

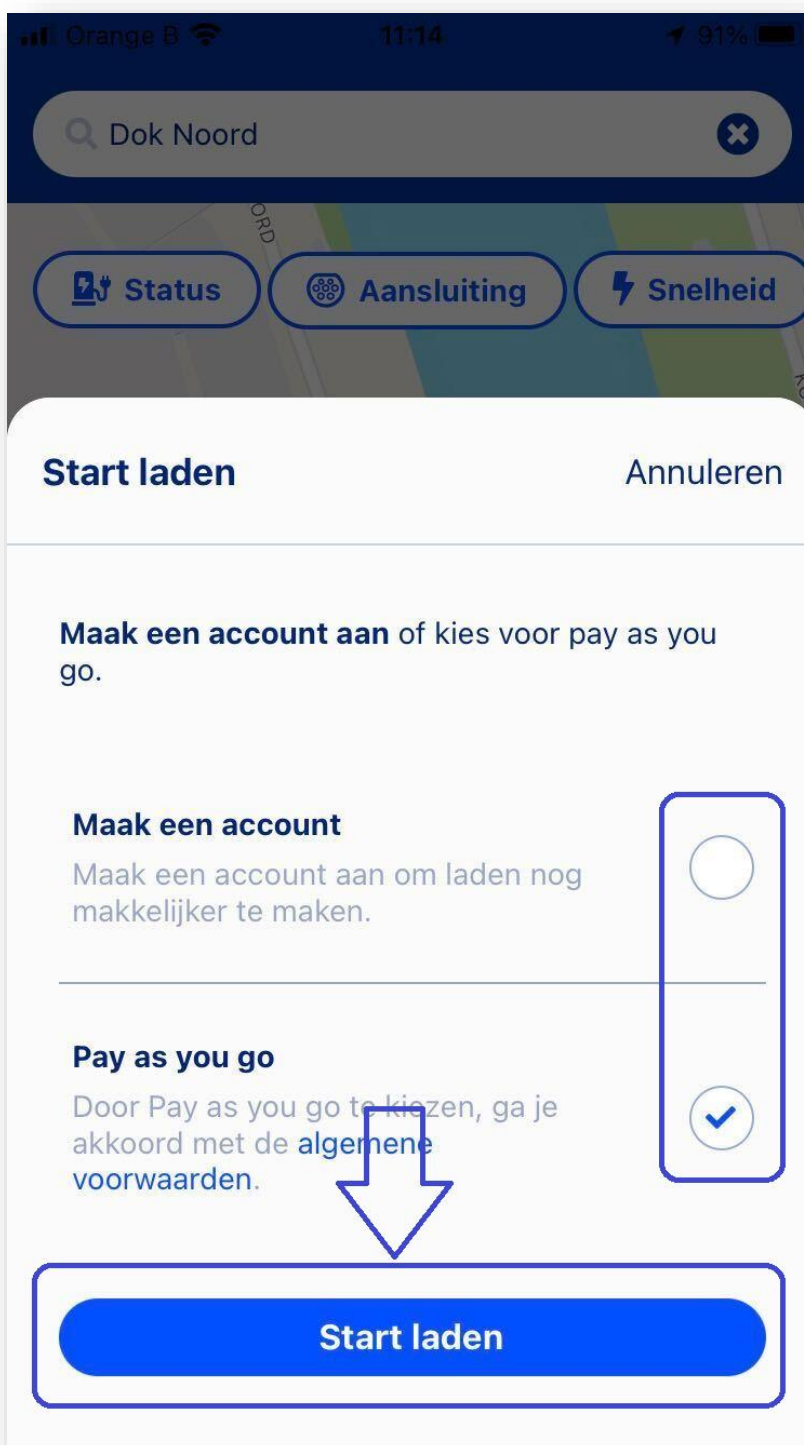

- Select the charging point on the map and click **'Select socket'**. Then you can drag up the box with details about the location and connectors using the grey horizontal bar to see all the info immediately.

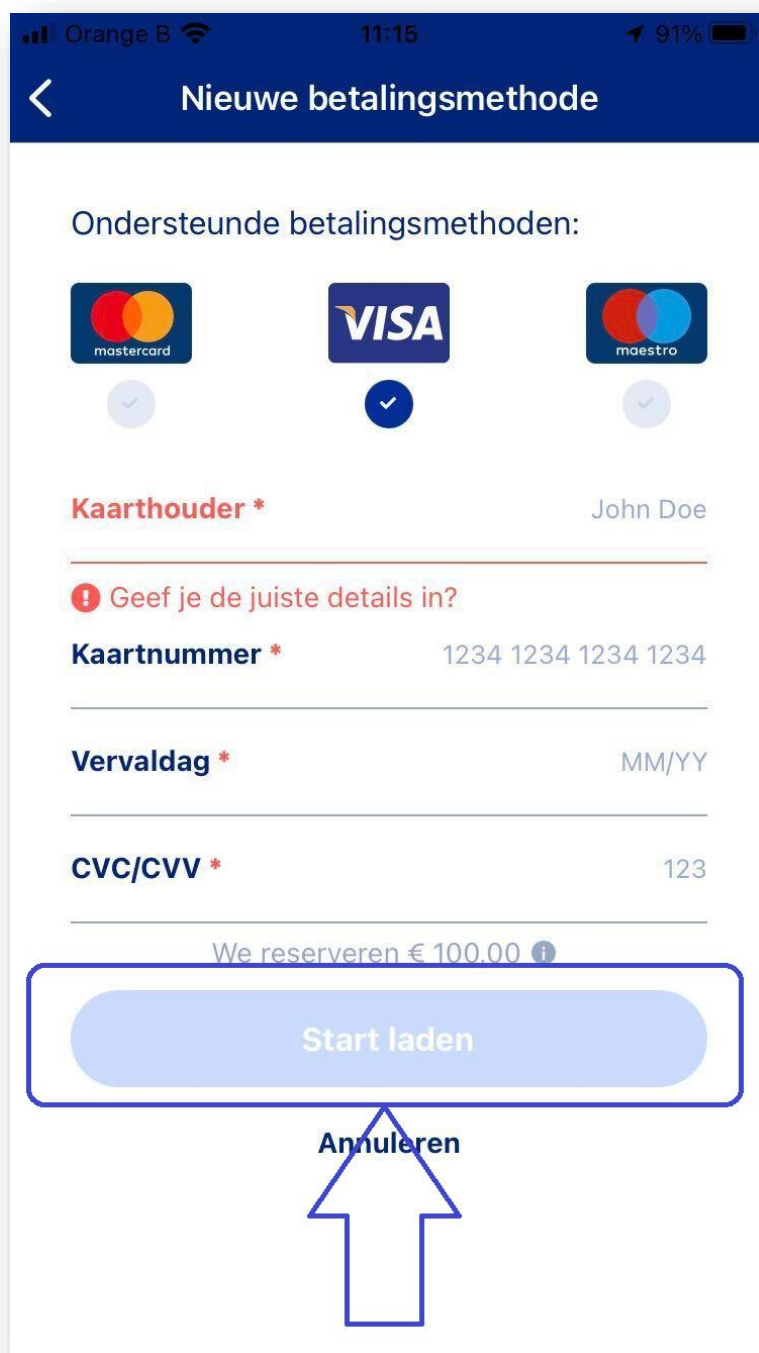

5. Select the free connector you wish to use to charge.
Click **'Start charging'**.

6. **'Pay as you go'** is indicated by default, but you can also choose to create a free account. Make your choice and click **'Start charging'**.

7. Choose your preferred credit card and complete the details. Click **'Start charging'** to start your charging session. €100 will be reserved until the session is closed. The difference will be calculated. To stop a charging session, disconnect your car or click **'Stop session'** in the Mobiflow app.
