

How do I **start a charging session in the app** that is **paid ad hoc**?

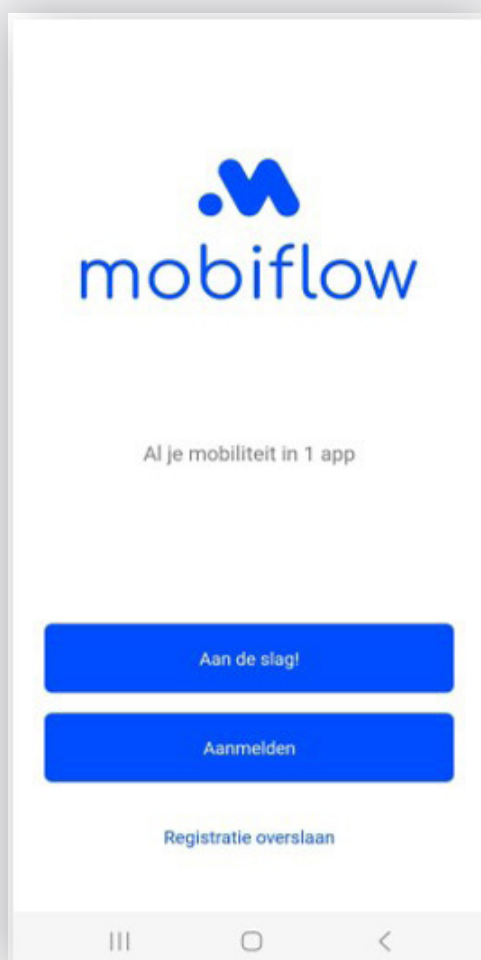

User Guide

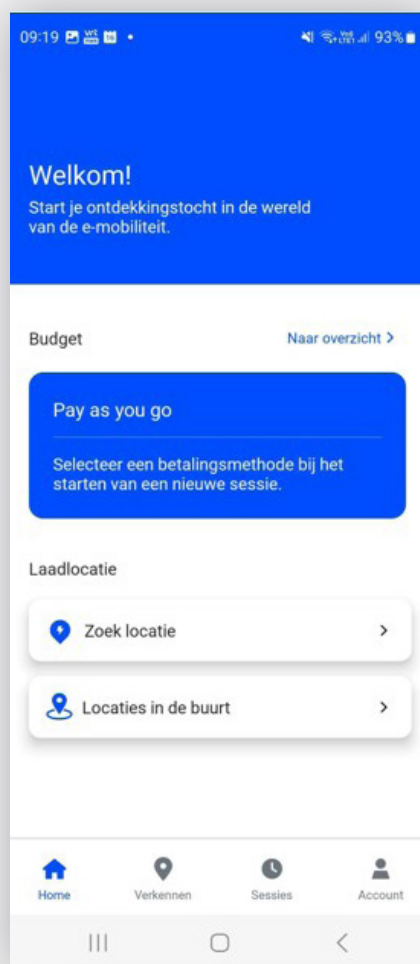

1

Download the Mobiflow app from the Apple Store or Google Play Store. Click **Skip registration** to proceed with an ad hoc payment.

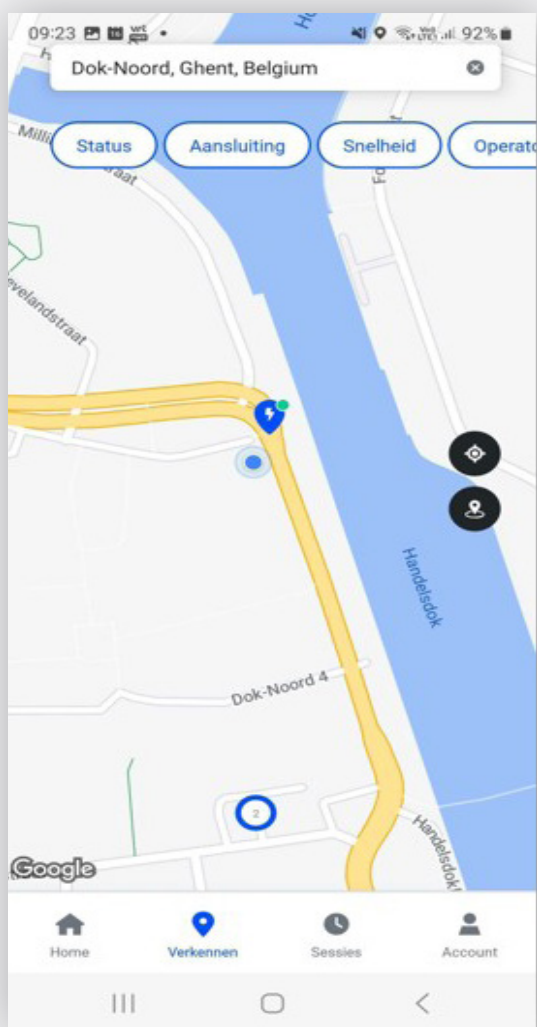

2

Click the **Search location** button and enter your location in the search field.

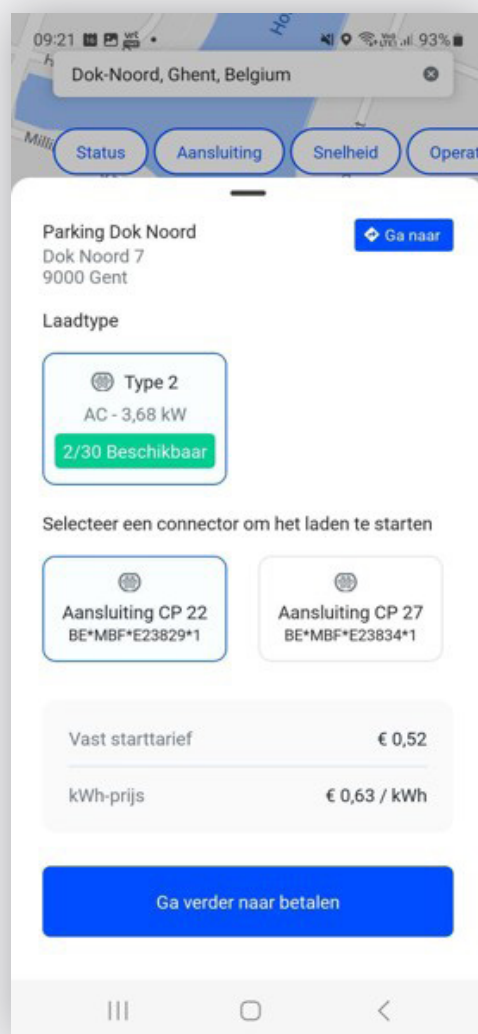

3

Select the **charging point** on the map and click on **Charging type** and **Connection**. Then you can drag up the box with details about the location and connectors using the grey horizontal bar to see all the info immediately.

4

Afterwards, click on **Continue to payment**.

5

Select **Credit card** and click on **Continue**.
